

Our project is still ongoing and we aim to keep you updated so...

What's new?!

The **Wiseme website** was launched, and you can learn more about the project, partners, and results of the project.

Find it here: <https://wiseme.eu>

ABOUT THE PROJECT

Wiseme project aims to support the development of a high-performing digital education ecosystem by building capacity and a critical understanding of how to exploit the opportunities offered by digital technologies for teaching and learning at all levels. The focus is on fostering both basic and advanced digital skills as well as digital literacy, which has become essential for everyone's life and for enabling people to navigate a world full of algorithms and fully participate in our society and democracy.

Wiseme Handbook Development Kicks Off! The team is currently creating and designing seven modules focused on engaging educational experiences for educators. The content is currently under development and will focus on providing practical, accessible, and inclusive learning resources.

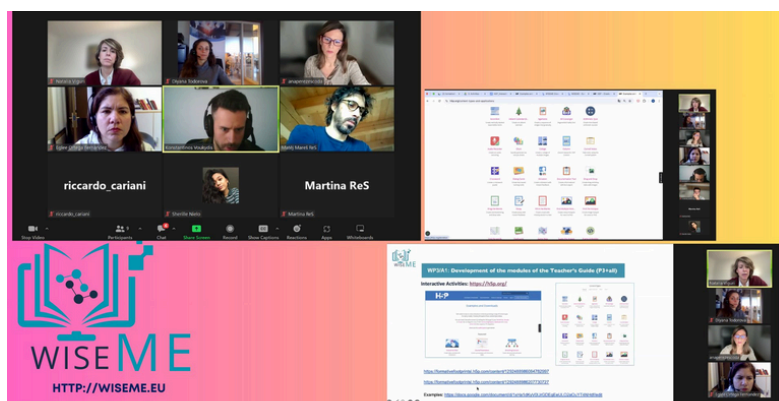

We successfully drafted the **Wiseme online platform**. After thorough discussion, the consortium decided to integrate H5P interactive elements directly into the platform to enhance learner engagement. These activities will support students in learning through practical tasks and digital tools.

We looked deeper into our **Wiseme chatbot** to tackle potential queries and provide the necessary information for our target groups to get accurate and reliable information.

Our **online meetings** are still ongoing to check on the progress of the project as we collaborate for creating impactful tools to help our secondary education students (12–17 years old), their teachers, and also educational institutions, families with secondary school children, and organisations responsible for youth development.

Transnational Project Management Meeting in Prague

Checking on the progress of the WiseMe Project Management Meeting in Prague!

We are excited to highlight the successful Transnational Project Management Meeting for WiseMe, hosted by Odpovědná společnost, z. s. / Responsible Society, an NGO in Prague. This event brought the consortium together to check on the progress of our collaborative journey to enhance digital education across Europe.

The meeting involved the dedication of all partners, brainstorming sessions, and generating ideas for further improvement of the project. We explored suggestions to tackle fake news and brainstormed chatbot names for our digital helper and other potential queries, and reached the conclusion of calling it "WiseMe Budy."

Next steps ahead:

We are entering an exciting phase of the WiseME project! Here is what is coming up:

- Finalizing the First Draft of the WiseME Handbook, followed by a pilot phase to gather feedback from educators.
- Completing the Initial Version of the Online Learning Platform, including interactive content and H5P activities, which will then be piloted in real learning settings.
- WiseMe Budy will be launched in a pilot version for testing and refinement.

But more about them in our next 3rd newsletter!
